Coursera · in progress

TOEIC preparation
ISET Mahdia · 2026-2027

STRENGTHS

Teamwork · Adaptability · Project management · Creativity · Problem solving

INTERESTS

- Keeping up with new technologies
- Personal coding projects
- Travel

Ines Ghammam

3rd-year student · Information Systems Development

Seeking a 4-month final-year internship (PFE) — spring 2027

PROFILE

As a final-year Bachelor's student in Information Systems Development at ISET Mahdia, I build complete web applications, from data modeling to the user interface. During my internship at Tunisie Telecom, I developed **OptiMSAN**, an application for managing a telecom access network. I am looking for a final-year internship to carry out a complete project, from analysis to delivery, as part of a team.

EXPERIENCE

Technical internship · Tunisie Telecom — July 2026

OptiMSAN — web application for managing an MSAN access network

- Built an application with three roles (customer, administrator, technician) to manage MSAN equipment, subscriber faults and new line requests.
- Modeled the network inventory on 5 levels (zone, site, shelf, card, port), tracking the status of each port: free, in use, faulty or reserved.
- Implemented fault tickets (assignment to a technician, tracking, closure) and line requests, from approval to the allocation of a free port.
- Port saturation dashboard per site, interactive maps of sites and requests, Excel import and export.
- Technician geolocation (faults within 15 km) and line speed estimation based on line length and standard (ADSL2+, VDSL2).

Symfony 7.4 · PHP 8.3 · MariaDB · Twig · Bootstrap · Leaflet · PhpSpreadsheet

Introductory internship · Banque Nationale Agricole (BNA) — Jan – Feb 2025

Internship in the IT department: discovered how a bank's information system operates.

PROJECTS

Personal portfolio — inesgha.github.io

Responsive website built without a framework: saved light and dark mode, scroll animations and animated butterflies in JavaScript.

HTML · CSS · JavaScript

Digital wedding invitation — github.com/inesgha/invitation

Animated multi-scene web page: canvas particles, background music, scroll reveals and an RSVP form.

HTML · CSS · JavaScript

EDUCATION

National Bachelor's Degree in Computer Technologies — Information Systems Development — 2024 – 2027

ISET Mahdia · Higher Institute of Technological Studies

Key courses: service-oriented architecture (SOA), advanced databases and big data, object-oriented design (UML 2), web and mobile development (native and cross-platform), software testing and validation, DevOps pipelines, .NET and Python programming.

Baccalaureate in Computer Science — 2024
